BB omega

inspirational design

committed to innovation

When we think of Omega, we like to think of a range at the very leading edge of laminate innovation. That way you can be confident you are choosing a worktop at the forefront of trends that will deliver a lasting design impression.

Omega centres on design and texture combinations that take laminate to a new sensory level. Where the eye and the touch are pleased simultaneously by the way the worksurface looks and by the way it feels.

Recognising the appeal of natural stone in the kitchen, there are beautiful designs inspired by slate, limestone and granite complemented by a subtle, riven texture. We salute the luxuriousness of polished stone with our signature range of metallic worksurfaces. The contemporary colours, enriched with subtle pearlescent flecks and a deeply lustrous gloss surface, are irresistibly tempting. And last but by no means least, come the exotic woodgrains with their very gorgeous aesthetic, looking and feeling just like freshly sanded wood.

Omega worksurfaces marry design highlights with empathetic surface textures. They are exciting and engaging. They are also a byword for outstanding quality.

Ruby Quartz worksurface
and upstand

gorgeous and glamorous

For up-market chic, there is little to beat the luxurious looks of polished stone. Now you can achieve this with our choice of stunning metallic-based designs in a host of contemporary colourways. The high definition terrazzo print is delicately flecked with pearlescent particles and topped off with a lustrous high gloss finish. Designer luxury. Yet reassuringly affordable.

When choosing our metallic designs, remember they are just like other high fashion, high gloss worksurfaces and require some TLC to maintain their luxurious looks. So no chopping, cutting or placing hot items directly onto the surface please.

Vanilla Quartz
worksurface and upstand

Ebony Stripwood
worksurface
and Champagne
splashback

exotic luxury

The allure of exotic woods is irresistible. Omega re-interprets nature's finest species to offer of the moment contemporary styling. The beautifully sumptuous olivewood, figured wenge and edgy stripwood designs are guaranteed to add design grace. What's more, their stunning visual appearance is enhanced by the sensuous ultramatt texture. This refracts the light beautifully giving an even colour tone the entire length of the worksurface. So it will feel every bit as luxurious as it looks.

Enhance the look with one of our new pearlescent splashbacks in high gloss. Available in three contemporary colours of Graphite, Champagne and Ambre, they give a lovely contrast to the matt feel on the worksurface.

Charcoal Slate
worksurface and splashback

natural beauty

Nostalgic. Timeless. And incredibly fashionable.

That's the appeal of natural stone for worksurfaces. Omega captures the authenticity of limestone and slate with its delicate colour palette. But it's the innovative surface textures that bring the designs to life, giving them a luxuriousness to envy.

Noir Riven
worksurface

black is beautiful

Always. The unique colour that says smart, classic, glamorous or contemporary. Noir Riven takes black to a new design level. It combines the luxury appeal of black gloss, with a gently riven texture. The perfect design for those with uncompromisingly high standards.

Inspirational chic

Be original. Add an elegant design touch with our new Rococo splashbacks. Available in black or white, they are inspired by the trend for texture and pattern in the home.

The flower motif has a beautiful frosted feel with a sophisticated interplay between gloss and matt textures. And the large sheet size available gives you an uninterrupted decorative surface area to enjoy.

Dramatic in black or delicate in white, they will appeal to the individualist in you.

Rococo Noir splashback
with Crystal worksurface

finishing touch

Splashbacks are a wonderful bonus to any kitchen. They provide a seamless area between the worksurface and wall cabinetry that is totally functional and easy to maintain. More than that, they are the perfect design complement. Choose a matching splashback or combine different designs together for originality.

Take a look at our new pearlescent high gloss metallics in lovely neutral colourways of Graphite, Ambre and Champagne. Ever so stylish, they are guaranteed to make a real design statement.

Quality

Manufacturing with the finest materials is what gives Bushboard worksurfaces their signature quality compared to competitive products. While beautiful and stylish to look at, they are also constructed to cope with the wear and tear of everyday living.

Independently tested to BS/EN438, your Bushboard worksurface is designed to withstand knocks, abrasions, chemicals, cigarette burns, steam, stains from juice, tea, wine or coffee. It is also highly resistant to heat, although we recommend the use of a protective pad as saucepan bottoms can become extremely hot.

Bushboard select E1 grade high-density particleboard for strength and stability. Its homogenous construction generates excellent machining capability for sink cutouts and mitre joints. They are surfaced in Polyrey high-pressure laminate. A resin impregnated moisture resistant barrier combines with Bushboard's unique 'Tekseal' cast resin to completely seal the underside against moisture penetration from everyday spills.

Hi Gloss, Frosted Gloss and Metallic finish

These premium textures need a little more care and attention than our standard Surf and Fa finishes. While the HiGloss technology offers an advanced level of protection against scuffing, please remember they are fashionable finishes and tend to show marks and scratches more easily with everyday use. This is also true of dark plain colours such as Noir and Charcoal Slate. To maintain the appealing looks of these textures, you should buff up the surface to a shine after a normal wipe down. See the Care & Maintenance section for recommended use of BB Complete Worktop Cleaner & Polish.

The metallic nature of Quartz, Strass and Silverfrost designs make them more sensitive to heat, so please take care to use a protective pad.

As with any laminate worktop, you should avoid chopping, cutting or placing hot items directly on to the surface.

Lifetime Guarantee

Bushboard worksurfaces are guaranteed for their lifetime. Bushboard will make good by repair and/or replacement (at its discretion) any Omega product of its manufacture which can be shown to have failed by reason of defects in its manufacture, subject to fair wear and tear, provided the product has been installed and used in accordance with the manufacturer's instructions and that the products are used for their intended purpose / application. Proof of date and place of purchase required. This guarantee is in addition to your statutory rights as a consumer and does not affect your rights in any way.

Splashbacks

Splashbacks should always be installed at least 130mm from a hob or heat source.

Installation & Finishing

As part of our worktop programme, we have developed BB Complete which is a bespoke range of colour-matched adhesives for the installation and finishing of your chosen Omega design. BB Complete is specially designed to replace silicon which may break down over time and cause moisture ingress. BB Complete offers superb performance characteristics and enables your installer to bond, joint and seal your worksurface, upstands and splashbacks giving you a long-lasting, professional finish.

Care & Maintenance

Bushboard worksurfaces are so easy to maintain. On a day to day basis, all you need to do is wipe them down with a moist cloth and your favourite mild detergent. For more stubborn marks such as fruit juice or coffee, leave the detergent to soak on the surface for a little while before rinsing thoroughly.

In addition to your regular cleaning, we recommend the application once a week, or as required, of BB Complete Worktop Cleaner & Polish. It is specially formulated to hygienically clean, polish and protect your worksurface giving it a shiny, protective sheen that is streak-free and easy to clean every day. Available in a handy 100% recyclable 500ml spray pack, it contains beeswax and vegetable-derived ingredients for minimum environmental impact.

Obviously, your worksurface can become damaged if mistreated, so we recommend some sensible measures like placing hot pans or casserole dishes on protective mats and mopping up spills quickly. Full details can be found in our Care & Maintenance leaflet. One of these is included with every worktop purchased but if you need a copy please call our Customer Service Team or log onto our website.

made by Bushboard

Bushboard is the UK's largest independent manufacturer of worksurfaces. With a manufacturing history dating from the 1930's and more than 25 years experience in the production of premium worksurfaces, we are confident about the quality and the style statement our worksurfaces can make to your home. Continual investment, combined with real passion for our business, means we use the latest technologies and manufacturing techniques to keep our products at the forefront of our industry. So confident are we about their superior quality, that all standard Omega worksurfaces carry a lifetime guarantee.

We have an exemplary record in health and safety. Over the last two decades we have received consistent recognition from the industry-recognised RoSPA (Royal Society for the Prevention of Accidents) and BSC (British Safety Council), gaining many awards in the process.

We also take our environmental responsibilities very seriously. In the kitchen industry, we are proactive in encouraging smarter use of 3m and 4.1m worksurfaces to try and reduce over-specification of product when shorter lengths will do the job. It means less off-cuts and waste having to go to landfill. We have reduced our landfill from 2400 tonnes in 2006 to less than 300 tonnes in 2008.

As a large consumer of chipboard, we ensure that all our material carries the PEFC or FSC certification, guaranteeing that it comes from properly environmentally managed and sustainable sources. We have also achieved independent PEFC accreditation to provide surety for 'chain of custody'.
